

CALL FOR TUTORIALS • IEEE SIGNAL PROCESSING SOCIETY

24th

IEEE Statistical Signal Processing Workshop

ANNECY, FRANCE • IMPERIAL CONGRESS CENTER

28 JUNE → 1 JULY 2027

IEEE SSP 2027 invites proposals for **tutorials** on established or emerging topics in statistical signal processing and its applications. Tutorials will run on **Monday, 28 June 2027**, the opening day of the workshop, giving attendees a grounding in the field before the main technical programme begins.

— PROPOSAL GUIDELINES

Submitting a Tutorial

Tutorial proposals will be judged on the technical quality, relevance and timeliness of the topic, the quality of the proposal, and the qualification of the speakers. Four to six two-hour tutorials are planned, with no more than two running in parallel. When registering, attendees may choose one tutorial in the morning and one in the afternoon. Tutorials with fewer than 10 registrations a week after the early registration deadline will not run, unless otherwise decided by the Tutorials Chair. It is the responsibility of the tutorial speakers to ensure no copyright issues arise from their presentation.

Proposal submissions are restricted to **6 pages** (excluding any sample presentation material) and must include the following information:

- ✗ Tutorial title
- ✗ Tutorial speaker(s): name, affiliation, email and web page
- ✗ Tutorial motivation and relevance
- ✗ Tutorial outline
- ✗ Short CV (max. two A4 pages in total) of all speakers
- ✗ Indication of whether the same tutorial will be submitted, within 12 months, to other conferences in the field, including previous submissions within the last 3 years and what will be different for the current submission

— DEADLINES

Tutorial proposals **Dec 07, 2026**

Notification of acceptance **Dec 21, 2026**
